

ALMOND ORCHARD NORTH AFRICA

BUSINESS AT THE HEART OF MISSION WORK

Business as Mission: business idea

In collaboration with the local church, World Partners is initiating the set-up of a **50-hectare almond orchard** in North Africa. A large share of the population in the project country is dependent on agriculture. That's why we see such great potential in setting up a successful agricultural business to reach out to the population while improving the local value chain.

World Partners will set-up an almond orchard with modern **irrigation and tree management techniques**. This will bring employment opportunities and technical knowledge to the region. The income from the farm will support local church growth and provide for the set-up of similar businesses in the future.

About World Partners

World Partners sees in business the potential to work with an abiding, positive influence on communities worldwide. Since 1995, we work towards the growth of God's kingdom by starting and supporting agricultural companies. We use a hands-on approach: we connect funds to projects, and also use our agricultural expertise to implement and manage these businesses successfully.

Our local team for this project consists of 5 enthusiastic members with agricultural background in the local sector. They have a local network and are currently being trained in almond orchard farming.

Step 1: Completed

Market research, partnership establishment, compare equipment quotes

Step 2:

Finding support and securing finances

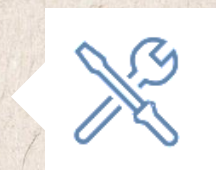

Step 3:

Purchase of land and transport of trees, equipment and machines

Step 4:

Planting of trees, installation of irrigation and machinery set-up

Step 5:

Local team manages orchard; support through visits and regular digital contact

FINANCES OVERVIEW: ALMOND ORCHARD NORTH AFRICA

Finances overview

With your donation, World Partners can initiate this business and realize the impact in this country.

The total investment for the set-up is € 550.000. The almond trees start producing nuts after 3 years, and are at maximum producing capacity after 6-7 years. The trees from the nursery can be sold annually, starting from year 2. Including depreciation and land purchase, the return on investment is projected at 10 years, at an annual profit of € 110.000.

The finances will be used as **revolving funds**: with the profits of this business, we will initiate and support similar agricultural projects in this region, to maximize the impact of your donation.

ANBI Status

World Partners is a registered 501(c)(3) and ANBI organization. Donations can be deducted from income tax.

Investment

	Amount
Land purchase	€ 290.000
Orchard set-up	
Field preparation	€ 17.500

Fence	€ 15.000
Irrigation	€ 75.000
Equipment	
Orchard tractor	€ 30.000
Harvesting machinery	€ 9.600
Transportation	€ 2.500
Cashflow finance	€ 90.000
TOTAL	€ 550.000

Experience from Central Asia

Five years ago, World Partners started a similar company in Central Asia. This business started as a 30-hectare apple orchard and is now successfully producing quality apples for the local market. In addition, we started a tree nursery at the orchard, where we grow and sell 60.000 quality trees annually, as well as we have implemented irrigation systems at over 20 orchards in the region.

Through these activities, this business has significantly improved the local value chain and provides mission opportunities on a daily basis. With the **know-how and experience from this proven concept** we want to implement the same model in a new region, to improve the local value chain and reach a whole new area with the good news of God.
